FIG. 1

# Network with Various Uncorrelated Load Balancing Algorithms

716.2

### SAMPLE HASH BUCKET SETUP

	Hash Bin - Equal Load Balancing															
Npath	0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
2	0	1	0	1	0	1	0	1	0	1	0	1	0	1	0	1
3	0	1	2	0	1	2	0	1	2	0	1	2	0	1	2	x
4	0	1	2	3	0	1	2	3	0	1	2	3	0	1	2	3
5	0	1	2	3	4	0	1	2	3	4	0	1	2	3	4	x
6	0	1	2	3	4	5	0	1	2	3	4	5	x	x	x	x

For the case of unequal load balancing, paths can be assigned to the hash bin taking account of the weightings. For example, for Npath=2, using one path twice as much as another, using 16 bins, the bins can filled in as {0,0,1,0,0,1,0,0,1,0,0,1,0,0,1,0}. This is not exact but matches the weights closely. Alternatively N\_bin can be set to 15 and the bins filled in for example as {0,0,1,0,0,1,0,0,1,0,0,1,0,0,1}.

FIG. 3

2023-07-27 14:00:00

The following table shows the results of the regression analysis for the dependent variable  $\ln Y$  (ln of the dependent variable) and the independent variables  $X_1$  to  $X_6$  (ln of the independent variables). The table is divided into two parts: the first part shows the results of the regression analysis for the dependent variable  $\ln Y$  and the independent variables  $X_1$  to  $X_6$ , and the second part shows the results of the regression analysis for the dependent variable  $\ln Y$  and the independent variables  $X_1$  to  $X_6$ .
